# RT-2 Series Bread & Bun Toasters

These toasters are the standard of the industry, and are now better than ever! Both models have an oversize three-inch by eleven-inch opening, allowing for the toasting of thicker bread products. Toasting is a snap even for inexperienced personnel because of the easy to use controls.

## MORE CONSISTENT TOASTING

The RT-2VSE and the RT-2VSHO have a more balanced toasting chamber and higher wattage than previous models. These toasters are the standard of the industry, and are now better than ever!

## MORE DURABLE

Extra heavy-duty components assure reliability for years of dependable service. New controls for speed, one- or two-sided toasting and power are improved for ease of operation.

## TWO MODELS FOR DIFFERENT VOLUME NEEDS

The RT-2VSE is the 'Energy Saver' of high-volume toasters. Designed for all types of toasting, this model economically operates on a 20 amp service and is rated at a maximum of 750 slices per hour.\*

The RT-2VSHO is built for ultra-high volume use in operations where a heavy breakfast trade is a speciality. It is rated at a maximum of 950 slices per hour,\* and requires a 30 amp circuit.

## SPECIAL FEATURES

Both models have an oversize three-inch by eleven-inch product entry opening, allowing for toasting of thicker bread products. Toast color is governed by just one control - conveyor speed - eliminating unwanted adjustments to a heat control by inexperienced personnel. The heavy-duty power switch can be set for on/off or stand-by mode (stand-by allows the toaster to operate at low power consumption when not in continual use, with the capacity of reaching full temperature in a fraction of the normal war-up time.)

## TOASTS A VARIETY OF PRODUCTS

In addition to all types of sliced bread, both models can toast or warm English muffins, bagels, ethnic breads, buns, rolls, frozen waffles, and more!

## SAVORY WARRANTY

One (1) year warranty from date of purchase on both parts and labor. See price list for details and conditions.

### RT-2VSE "Energy Saver" Toasters

Model	Volts	Amps	KW	Dimensions H x W x D	Net Wt. lbs/kg	Ship Wt. lbs/kg	Ship Vol. cu ft/cu m
